Product Description

Toro Front Tine Tiller - 58602

The Toro Front Tine Tiller features a two-position, heavy-duty, cast iron tail and wheel assembly. With the wheels in the forward position, transport is a breeze. In the extended position, the center of gravity is lowered for incredible control and deep-tilling performance in the row. Powered by a 163cc 4-cycle Briggs and Stratton engine, the tiller provides plenty of power to accomplish your tilling tasks. Easily adjust the tilling width with no tools required by simply adding or removing tines. The tilling width can be adjusted from 11 inches, up to 21 inches wide. With its compact frame and balanced weight distribution, allows for fluid navigation in tight growing spaces and stable pivoting capability at the end of garden rows. The airless wheels, robust forged tines, and all steel construction are all hallmarks of a tiller built to last.

- Powerful 163cc 4-Cycle Briggs and Stratton Engine
- Adjustable Tilling Width (11”, 16”, 21”)
- Variable wheel settings allow for optimal balance and transport
- Low center of gravity for increased control
